June temperatures

This task is about place value with decimal numbers.

The temperatures in June were recorded to the nearest tenth of a degree.

a) The warmest temperature was 12.7°C and the third warmest temperature was 12.5°C.

What was the second warmest temperature? _____ °C

b) The coldest temperature was 2.8°C and the third coldest temperature was 3.0°C.

What was the second coldest temperature? _____ °C

c) The average temperatures for June for the last five years were:

8.2°C	**8.4°C**	**7.9°C**	**8.1°C**	**8.0°C**

Put the temperatures in order from coldest to warmest:

_____ _____ _____ _____ _____

coldest **warmest**
