# Stream feeding relationships

#### Stream feeding relationships

#### Stream feeding relationships

NOTE: Different streams and rivers will have different combinations of plants and animals living there.

## **Plant eaters**

Herbivores	What they eat
Mayfly	Algae
Water snail	Algae, leaves

## **Animal eaters**

Carnivores	What they eat
Backswimmer	Larvae
Dobson fly	Larvae
Damsel fly	Insects, larvae
Water spider	Water boatman, backswimmer
Eel (young)	Macro invertebrates
Eel (adult)	Fish, ducklings
Inanga	Insects, larvae
Banded kokopu	Insects , larvae
Redfin bully	Larvae, snails, crustaceans
Upland bully	Larvae
Common bully	Larvae, small fish, crustaceans, molluscs
Trout (young)	Larvae
Trout (adult)	Young eels, shrimps, bullies
Kingfisher (kōtare)	Fish (e.g. young trout and eels, bullies), shrimps
Fantail (pīwakawaka)	Flying insects (e.g. Dobson Fly, Mayfly, Sandfly)
Blue duck (whio)	Aquatic insects such as Caddis fly, Stonefly and Mayfly
Cat	Birds, rats

## Others

<b>Omnivores &amp; scavengers</b> Bacteria Water boatman Flatworm	<b>What they eat</b> Dead plants and animals Algae, larvae Algae, dead animals
Water flea	Algae, dead animals
Bloodworms	Dead plant and animal matter
Cased caddis fly nymphs	Dead plant material
Net-building caddis fly nymphs	Floating plant material, algae, small invertebrates
Stoneflies	Larvae, algae
Shrimps	Dead animals
Fresh water crayfish (koura)	Aquatic plants, invertebrates, dead plant and animal matter
Koi carp	Plants, insects, young fish
Mallard ducks	Aquatic plants, land plants (e.g., grass), insects, plankton, snails
Rat	A wide range of plant and animal matter including water spiders, ducklings, dead animals, berries, and seeds

NOTE: Omnivores eat plants and animals. Scavengers eat dead plant and animal material.
