

Shaded fraction shapes

This task is about recognising the fraction that has been coloured of different shapes.

a. What fraction of the shape has been shaded?

- $\frac{3}{7}$ $\frac{7}{13}$ $\frac{7}{8}$ $\frac{7}{10}$ $\frac{7}{3}$

How did you work it out?

b. What fraction of the shape has been shaded?

- $\frac{1}{2}$ $\frac{1}{3}$ $\frac{1}{4}$ $\frac{1}{5}$ $\frac{1}{8}$

How did you work it out?

c. What fraction of the shape has been shaded?

- | | | |
|-------------------------------------|-------------------------------------|-------------------------------------|
| <input type="radio"/> $\frac{3}{4}$ | <input type="radio"/> $\frac{4}{3}$ | <input type="radio"/> $\frac{4}{7}$ |
| <input type="radio"/> $\frac{5}{3}$ | <input type="radio"/> $\frac{5}{8}$ | <input type="radio"/> $\frac{5}{4}$ |

How did you work it out?

d. What fraction of the shape has been shaded?

- | | | |
|-------------------------------------|--------------------------------------|-------------------------------------|
| <input type="radio"/> $\frac{1}{4}$ | <input type="radio"/> $\frac{2}{3}$ | <input type="radio"/> $\frac{2}{5}$ |
| <input type="radio"/> $\frac{3}{4}$ | <input type="radio"/> $\frac{3}{16}$ | <input type="radio"/> $\frac{3}{8}$ |

How did work it out?
