

Learning intention guides

Learning intention guides

These guides are designed so teachers can select the writing criteria they want to use for the focus of an assessment.

After selecting the *criteria* for structure and language features **and** whether to have a *teacher* or a *student* guide, click the  button to construct an assessment guide appropriate to the needs of the individual students, the groups, or the class.

These learning intention assessment guides can be used with a range of assessment resource banks and teacher-developed assessment tasks.

Resource List
