

# Netball games

---

This task is about finding the percentages of numbers.

Anne's netball team won 50% of their games. The team played 22 games.

How many games did they win?

Marama's netball team won 75% of their games.

If the team played 24 times, how many games did they win?

Joe's team won 60% of their games.

If the team played 25 times, how many games did they win?

Cassie's team won 35% of their games. The team played 20 times.

How many games did they win?
