Kia ora koutou

With the Rugby World Cup (RWC) drawing to a close, we thought we'd dig out some classroom assessment resources that connect in with rugby.

You will need to be logged in to view the resources (don't have a teacher login? [register](#))

At Curriculum **Level 2** we have

Missing numbers (number patterns)

Level 3

Number one (Cloze reading)

Writing a letter (proofreading)

Sports on TV (interpreting graphs)

Finding out about sports on TV (stats investigation)

Favourite rugby teams (graph construction)

Favourite All Black (interpreting a frequency table)

At Level 4

Sports played (graph construction)

Henare's try (proofreading)

Kick a ball (interpreting stem-and-leaf graphs)

At Level 5

Using a formula I (linear equations)

Is rugby given too much importance in New Zealand? (writing an argument)

Rugby Brawl story (writing a report)

And Kicking for goal (using Pythagoras' theorem)

For some of the statistical investigations it may be interesting to discuss how the popularity of the current RWC affects how people regard other sports.

The ARB team
