

Buying a phone

This task is about solving problems involving money.

Sina wishes to buy a phone priced at \$96.00.

a) If she decides to pay for it in 8 equal monthly payments, how much will she pay each month?

<input type="radio"/> \$6	<input type="radio"/> \$9	<input type="radio"/> \$12	<input type="radio"/> \$16	<input type="radio"/> \$24
---------------------------	---------------------------	----------------------------	----------------------------	----------------------------

b) If Sina chooses to pay $\frac{1}{3}$ of the \$96.00 price as a deposit, how much will that be?

<input type="radio"/> \$16	<input type="radio"/> \$32	<input type="radio"/> \$48	<input type="radio"/> \$64	<input type="radio"/> \$96
----------------------------	----------------------------	----------------------------	----------------------------	----------------------------

c) Sina wants to pay \$6 per month, after making the first cash payment of \$24. How many months will it take her to pay for the MP3 player?

<input type="radio"/> 4	<input type="radio"/> 6	<input type="radio"/> 8	<input type="radio"/> 12	<input type="radio"/> 16
-------------------------	-------------------------	-------------------------	--------------------------	--------------------------
