

Recycling week 21-27th October 2019

Recycling week 21-27th October 2019

Submitted by jonathan on Fri, 10/18/2019 - 12:14

Kia ora koutou

Recycling week is upon us, from **21-27th October 2019**.

This year it's about looking at habits and taking action.

Choose from a range of activities for each day during the week and the weekend

As a part of recycling week you could try to **use only online-interactive ARBs** with your students.

We have a number of ARB resources that address the Science and English around recycling:

- Recycling materials L3
- Recycling - true or false? L3
- Recycling advertisement L3
- Recycling aluminium L3
- Advantages and disadvantages of recycling L3
- Plastic recycling L3.

At a systems level recycling is also about students recognising what types and amounts of materials are available for recycling e.g.,

- Beach clean-up
- Cleaning up the beach

and/or identifying what materials do not belong in certain environments e.g.,

- Rubbish on the beach L1/2
- A mystery photo L1/2.

Use these as starting points for discussion around the purpose of recycling.

Also important is the broader idea of Recycle, reduce and reuse.

If you want more, use “recycling” as a keyword to find more resources.
