

Number sentences IV

This task is about identifying the number or symbol needed to make a number sentence true.

Year 8

Questions/instructions

Lee delivers newspapers. Let \square represent the number of newspapers that Lee delivers each day.

a) Which statement represents the total number of newspapers that Lee delivers in 5 days?

(A) $5 \times \square$

(B) $5 + \square$

(C) $\square \div 5$

(D) $(\square + \square) \times 5$

b) Write $>$, $=$, or $<$ to make this statement true:

$456 \div 8 \square 456 \times \frac{1}{8}$
