

Look up the index!

This task is about knowing how to use an index.

An index is a list, given in alphabetical order, that states the subjects, names, and other important terms in a book. Page numbers are given to help you find where something, that is stated on the index, is located in the book.

Index

- Ant 20-21
 - antennae 21
 - colonies 20
 - food 20, 21
 - trails 21
- Bumblebee 12-13
 - colour 12
