

Going up in the lift

This task is about looking at the illustrations in a poem.

Read the poem "Going Up in the Lift", pages 16-17, School Journal, Part 1, Number 2, 1993, and use the pictures to help answer the questions.

. What makes the zebra and the man carrying the pies look similar?

. What are two ways the boy looks like the monkey?

1.

2.

. What do the two black lines near the boy's skateboard show?

. What similar things happen when the lift stops at the first, second and third floors?

. What is one way the artist shows that the girl on the rollerblades is moving?

- Stars, zig zag shapes and wiggly lines have been drawn around the animals getting out at the fifth floor. What do these shapes show about the circus?

- In each picture the artist has given a hint about who is going to get out of the lift on the **next** floor. How has the artist done this?
