Dice combinations II

This task is about finding all possible combinations.

Use the 3 dice you have been given to investigate how many different ways they can be turned so that they only show odd numbers on the top faces. The first three patterns have been recorded for you.

1, 1, 3

1, 1, 3

3, 1, 1

You will see that each dice is moved to make a new combination.

Record all the different ways you can find in your Table Sheet.

Dice 1	Dice 2	Dice 3
1	1	3
1	3	1
3	1	1
