This task is about probability as a fraction.

A coin was flipped 3 times.

Write the letter on the number line above to show the probability of each outcome.

The first one has been done for you.

a)Outcome A: There were 4 heads.

- b)Outcome B: There were fewer than 4 heads.
- c) Outcome C: There were 3 heads.
- d)Outcome D: There were less than 3 heads.
- e)Outcome E: There were 2 or 3 heads.
- f) Outcome F: There was exactly 1 head.
