# Two coin game

Keita threw two coins in the air. Each time Keita threw the coins, she tallied how they landed.

Outcome	Tally	Frequency
Head Head	�captureHHH HHH III	13
Head Tail	HHH HHH HHH II	17
Tail Head	HHH HHH HHH HHH HHH HHH	20
Tail Tail		10

a) How many times did Keita throw the two coins? _____

b) What **proportion** of Keita's throws had an outcome of …

i) two heads? _____

ii) at least one head? _____

c) Draw an '**X**' on the scale below to show the probability of Keita throwing two tails, based on her data in the table above.

Impossible   Certain
