

Library books

This task is about reading a table.

A librarian kept a count of the kind of books borrowed from the library for a month. This is shown in the table below.

Kind of Books	No. Borrowed
Adventure	600
Mystery	1200
Romance	200
Poetry	300
Biographies	900
Magazines	400
	—
Total	3600

a) What kind of book is most likely to be chosen by the next person?

Adventure / Mystery / Romance / Poetry / Biographies / Magazines

b) What kind of book was chosen by 1 out of every 6 borrowers in that month?

Adventure / Mystery / Romance / Poetry / Biographies / Magazines

c) What are the chances that the next book to be borrowed is a biography?

d) What are the chances that the next book to be borrowed is an adventure or a mystery book?
