Missing cat

This task is about choosing how likely some outcomes are.

Plan of Nicky's Place

Nicky's cat Tiger went missing and a search party was sent out to find him. Tiger is just as likely to be found on any of the squares in the plan above. Using the plan of Nicky's place answer the following questions.

a) What is the probability that Tiger is found in the **paddock**? _____

b) What is the probability that Tiger is found in the **bush**? _____

c) What is the probability that Tiger is found in the **house** or in the **garden**? _____

d) Which part of Nicky's place is Tiger **least** likely to be found in? _____
