

Spinner for a board game

Aisha is shading in a spinner like the one above, for a board game. She wants to give these chances of scoring:

Lose a turn	$\frac{1}{8}$	Shaded	
Double your score	$\frac{1}{4}$	Shaded	
Treble your score	$\frac{1}{8}$	Shaded	
Take your score as it is	What's left	Not shaded	

Shade in the spinner to show these chances.
