

Soup and savouries

This task is about working out possible combinations of different numbers.

When Keri went to the cafe for lunch she had a choice of 6 types of soup and 5 savoury dishes.

a) How many different choices of soup and savoury dish combinations did Keri have?

combinations

b) If there were 3 types of soup that Keri did not like, then how many combinations of soup and savoury dishes did Keri have to choose from?

combinations
