

# Time to get to school

This task is about reading information from a graph.

Time children took to get to school

Nisha

Most children took less than 10 minutes to get to school.

Jason

Most of the class took 10 to 19 minutes to get to school.

Tim

Most children took more than 20 minutes to get to school.

Abby

Most children took less than 30 minutes to get to school.

This graph shows the time it took the children in Room 8 to get to school one day.

a) Which person made a correct statement about the graph?

- Nisha
- Jason
- Tim
- Abby
- They all made correct statements

b) Explain why you decided on your answer.

c) What is one problem with the way this histogram has been set up?
