

Time spent helping at home

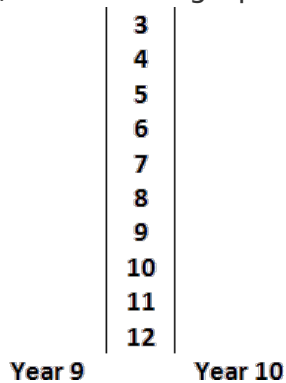

Some students decided to measure the time spent helping at home by Year 9 and Year 10 students. They asked a sample of students to record the time they spent helping at home one night.

They displayed their results on this back-to-back stem-and-leaf graph.

Time spent helping at home (in minutes)

a) Redraw the graph putting the numbers within each stem in order.

b) What was the least time spent helping at home by any of the students? _____ minutes

c) What was the median time spent helping at home by

i) the 21 Year 9 students? _____ minutes

ii) the 18 Year 10 students? _____ minutes
