

# Reading hours

This task is about interpreting a tally chart.

Tupou did a survey of her class to find out how many hours they spent reading in a week. This tally chart shows her results.

| Number of hours | Number of people |
|-----------------|------------------|
| 0-4             |                  |
| 5-9             |                  |
| 10-14           |                  |
| 15-19           |                  |
| 20-24           |                  |
| 25-29           |                  |

**None**

**Very few**

**Some**

**Most**

**Almost all**

**All**

Choose the **best** word(or words) from the box above to start each of these sentences.

- \_\_\_\_\_ of the students read less than 10 hours.
- \_\_\_\_\_ of the students read between 10 and 20 hours.
- \_\_\_\_\_ of the students read more than 20 hours.
- \_\_\_\_\_ of the students read 22 hours in total.
