

Building colours

This task is about identifying whether statements about a graph are true or not.

Students at Swan Primary were doing a project on building colours. On a trip to Wellington they noted the colour of the office buildings they saw along **two streets**. They made the following comments about what they thought their graph showed.

Select "**yes**" next to each statement that is correctly based on the students' data. Select "**no**" if it isn't.

- a) "We saw the same number of black and green buildings." *Yes/ No*

- b) "Not many people like black buildings." *Yes/ No*

- c) "We counted more grey than white buildings." *Yes/ No*

- d) "We saw six mirrored buildings." *Yes/ No*

- e) "Most Wellington buildings are grey." *Yes/ No*

- f) "We saw fewer green than mirrored buildings." *Yes/ No*

- g) "Blue was the third most common colour we saw." *Yes/ No*

- h) "We saw 13 buildings which were either black or white." *Yes/ No*

i) "There were four more grey than white buildings." *Yes/ No*

j) "Only four buildings in Wellington are blue." *Yes/ No*
