

# Sea shells

This task is about reading information from a bar graph.

Tanya collected different kinds of shells during a walk along Ohiwa Beach. Above is a bar graph of what she collected.

a) Which was the most common shell Tanya found?

b) Which shell did she collect the fewest of?

c) Tanya found **about** the same number of which two shells?

 and 

d) How many more scallops than whelks did she collect?
