

# Speed camera

---

| Type of vehicle | Number Passing Speed Camera | Number Caught by Speed Camera |
|-----------------|-----------------------------|-------------------------------|
| Private Car     | 1600                        | 20                            |
| Van             | 250                         | 15                            |
| Taxi            | 20                          | 5                             |
| Bus             | 30                          | 0                             |
| Truck           | 100                         | 10                            |
| <b>TOTAL</b>    | 2000                        | 50                            |

The table shows the number of vehicles passing a speed camera, and the number caught by the camera.

- a) What percentage of taxis were caught speeding? \_\_\_\_\_ %
- b) What percentage of all vehicles were caught speeding? \_\_\_\_\_ %
- c) Make a statement which compares the percentage of trucks with the percentage of all vehicles that were caught speeding.
