

Creating a scale

Shaun designed this scale to rate the difficulty level of his school work.

Level	Rating
Hard	1
Easy	2

Shaun's scale needs another level. What is another level he could add to his scale?

- _____
- i) Why does it need another level?
- a) _____
- ii) _____
- _____

b) Design your own scale with **five** levels to rate the difficulty level of your school work.

Level	Rating

Now you are going to use your scale to rate how hard you think your school work is.

- c) Draw a chart that has:
- i)
 - a place to write down the **time** you will do the ratings;
 - a place to write down the **rating** you give your school work.
- ii) Write on your chart **five times** that are evenly spread throughout the day.
- iii) Do the ratings at the times you have written down.
