

# Water temperature

---

This task is about collecting and showing data on a graph.

- a) • Your teacher will give you a thermometer and a container with hot water in it. Let this sit for 1 minute to allow the temperature to stabilise.
- Now record the temperature of the water and write this temperature in the table below at 0 minutes.
  - Keeping the thermometer in the water, record the temperature changes at 1-minute intervals over ten minutes.

<b>Time (minutes)</b>	<b>Water Temperature (°C)</b>
0	
1	
2	
3	
4	
5	
6	
7	
8	
9	
10	

b) On the grid below draw a graph to show your results over the 10 minute period. You will need to complete the x- and y- axes.

**Temperature change of water each minute over 10 minutes**
