

Student absences

This task is about looking closely at a graph.

At Redhills College they counted the number of students who were absent each day. Here are the results for the first ten days of the term.

Day number	1	2	3	4	5	6	7	8	9	10
Number of students absent	5	0	5	15	25	20	35	35	40	45

These results were plotted on the graph below:

List **three** things that are missing or incorrect about this graph.
