

Employment data

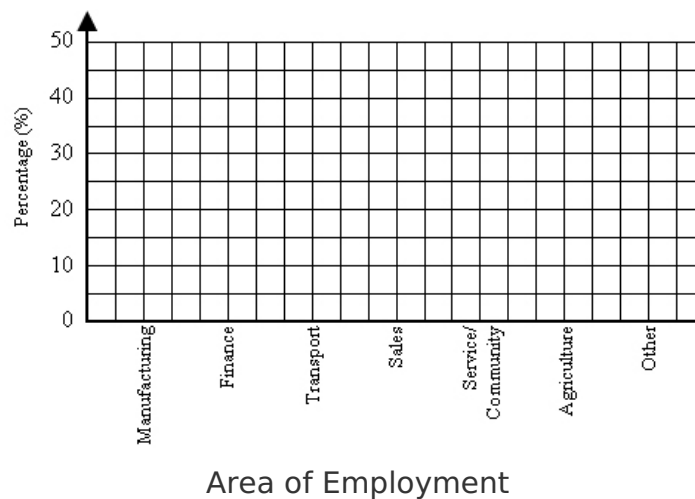

This task is about constructing and then reading information from a graph.

The table shows the number of people working in different areas of employment, in 1956 and 1996, as a percentage of all people in the workforce for each of these years.

Area of Employment	1956	1996
Manufacturing	22.6	12.1
Finance	3.9	16.5
Transport	5.1	4.7
Sales	21.4	22.2
Service or Community	41.2	36.0
Agriculture	4.7	6.8
Other	1.1	1.7
TOTAL	100.0	100.0

a) Graph this data as a composite bar graph on the grid below.

Percentage of People in Different Area of Employment in 1956 and 1996

b) Between 1956 and 1996, which area of employment had:

i) the largest percentage decrease in people working? _____

ii) the largest percentage increase in people working? _____

c) Name two areas of employment where the percentages of people working are most similar in 1956 and 1996.

_____ and _____
