

Lost golf balls

This task is about reading information from a bar graph.

Misha and his sister Amelia live near a golf course. Each evening they go out to look for golf balls lost in the rough.

They drew this bar graph showing how many balls they picked up in one week.

Number of Golf balls found by Misha and Amelia over the week

a) What was Amelia's best day for finding golf balls, and how many did she find on that day?

Day ; balls

b) What was Misha's worst day for finding golf balls, and how many did he find?

Day ; balls

c) On how many days in the week did Misha find more golf balls than Amelia?

days

d) What was the best day for the two of them combined, and how many golf balls did they find altogether on that day?

Day ; balls
