

Estimating multiplication

This resource assesses how you estimate in multiplication.

Estimation is an approximate answer you can easily work out without calculating the exact numbers.

- a) 8 students each have about 23 pens in their pencils cases.
Show what you did to estimate how many pens there are altogether.

There are about _____ pens altogether

- b) There are 12 friends who have about 27 Dragonball Z cards each.
Show what you did to estimate how many cards there are altogether.

There are about _____ cards altogether

- c) 94 students have about 56 marbles each.
Show what you did to estimate how many marbles there are altogether.

There are about _____ marbles altogether

- d) 241 students have about 37 Pokemon cards.
Show what you did to estimate about how many stickers there are altogether.

There are about _____ stickers altogether
