

Estimating with addition

This task is about estimating the sum of whole numbers.

An estimate is sometimes called a "good guess" that is easy to do in your head. The following questions are about estimating, NOT about working out the exact answer.

a) i) Estimate the sum of: $86 + 47 + 65$ _____

ii) Show or explain how you estimated the sum in the box below.

b) i) Estimate the sum of: $254 + 463 + 129$ _____

ii) Show or explain how you estimated the sum in the box below.

c) i) Estimate the sum of: $386 + 76 + 9 + 457$ _____

ii) Show or explain how you estimated the sum in the box below.
