

# Number line addition and subtraction III

---

This task is about showing how to solve addition & subtraction problems using a number line.

For the questions below show how to solve the equations on the number line.

a) Use the number line **below** to show how to solve the equation:  $78 + \square = 123$

b) Use the number line **below** to show how to solve the equation:  $209 + \square = 604$

c) Use the number line **below** to show how to solve the equation:  $230 - \square = 125$

d) Use the number line **below** to show how to solve the equation:  $375 - \square = 198$
