

Estimating addition IV

This task is about estimating the addition of numbers.

An estimate is sometimes called a "good guess" that is easy to do in your head. The following questions are about estimating NOT working out the exact answer.

a) i) Estimate the sum of **18 + 23**

ii) Show how you estimated the sum.

I estimated the sum was about _____

b) i) Estimate the sum of **16 + 27 + 41**

ii) Show how you estimated the sum.

I estimated the sum was about _____

c) i) Estimate the sum of **127 + 179**

ii) Show how you estimated the sum.

I estimated the sum was about _____
