Estimating addition II

Estimation is an approximately correct answer you can easily work out in your head, NOT the calculation of an exact amount.

Estimate the totals of the following sets of numbers. Do **not** calculate the exact total.

a) 364 + 238 + 174

Show how to get the approximate total.

The total is **about** _____

b) 2 387 + 3 628

Show how to get the approximate total.

The total is **about** _____

c) 438 + 531 + 247 + 571 + 361

Show how to get the approximate total.

The total is **about** _____
