How I estimate: Multiplication

This task is about different ways of estimating in multiplication.

There were 14 friends at a birthday party. They were each given a bag, and each bag had about 26 jellybeans in them.

Estimate **about** how many jellybeans there were altogether and show how you did this in the box below.

a)

My estimate is _____ jellybeans.

Show **another** way of estimating **about** how many jellybeans there were.

b)

My estimate is _____ jellybeans.

Show **a third** way of estimating **about** how many jellybeans there were.

c)

My estimate is _____ jellybeans.
