

Rounding numbers sensibly II

This task is about rounding numbers.

To give sensible answers to calculations people often round numbers.

1. The number 636 rounded to the nearest thousand is ...
2. The number 8,450 rounded to the nearest ten thousand is ...
3. The number 456,899 rounded to the nearest hundred thousand is ...

Write down one possible number which could be rounded to the stated value by following the given rule for rounding. The first one has been done for you.

Stated value when rounded	Rule for rounding	Possible number
Example: 350	To the nearest ten	347
800	To the nearest hundred	<input type="text"/>
2,000	To the nearest thousand	<input type="text"/>
90,000	To the nearest ten thousand	<input type="text"/>
400,000	To the nearest hundred thousand	<input type="text"/>
