

Writing word problems

This task is about writing addition, subtraction, multiplication and division word problems.

Use the information in the pictures below to write four word problems. You are to write a word problem using the operation (addition, subtraction, multiplication, or division) shown in each instruction. This example has been done for you, using the operation of addition.

If Timo bought 50 cents worth of choc drops and \$1.20 worth of bullets, how much would he have spent all together?

$$\$0.50 + \$1.20 = \$1.70$$

a) Write an addition word problem for this picture in the space below.

b) Write a subtraction word problem for this picture in the space below.

c) Write a multiplication word problem for this picture in the space below.

d) Using 'If I had \$3.50 to spend...' to start, write a division word problem for this picture in the space below.

If I had \$3.50 to spend...
