

Indoor cricket scores

This task is about calculating with negative numbers.

In a game of indoor cricket one point is given for every run and five points are taken off each time a wicket is lost.

Write down the final score for each of these teams.

A team is on -10 points. They get 30 more runs but lose another 5 wickets.

a)
They now have _____ points.

A team is on 11 points. They lose another 4 wickets but get 17 more runs.

b)
They now have _____ points.

A team is on 26 points. They lose another 6 wickets but get 38 more runs.

c)
They now have _____ points.

A team is on -19 points. They get 22 more runs but lose another 8 wickets.

d)
They now have _____ points.
