

Farm fractions II

This task is about adding or subtracting fractions.

a) On Harry's farm there are four kinds of animals:

- one-fifth are horses,
- one-tenth are cows,
- one-half are sheep, and
- the rest are pigs.

What fraction of the animals are ...

i) either horses or sheep? _____

ii) pigs? _____

b) On Barry's poultry farm there are four kinds of birds:

- one-third are hens,
- one-quarter are ducks,
- one-sixth are geese, and
- the rest are turkeys.

What fraction of the birds are

i) either ducks or geese? _____

ii) turkeys? _____

What is the difference between the fraction of ducks and the fraction of hens?

iii)
