

Plus, minus, times and divide

This task is about choosing the right operation to make number sentences true.

Select the sign (+ - × or ÷) which needs to go into each box to make the equation correct.
The first one has been done for you.

e.g., $15 \square 1 = 16$

+ would be selected because $15 + 1 = 16$

a) $36 [+ / - / \times / \div] 4 = 40$

b) $20 [+ / - / \times / \div] 5 = 100$

c) $80 [+ / - / \times / \div] 7 = 73$

d) $8 [+ / - / \times / \div] 4 = 32$

e) $36 [+ / - / \times / \div] 4 = 9$
