

Estimating lots

This task is about estimating with multiplication.

Do **NOT** use a calculator for these tasks.

a) Each of these 5 pots has 387 gold coins in it.

In the box below show how you would **ESTIMATE** (using simple sums and without using a calculator) the number of gold coins in the **5** pots.

i)

ii) My estimate of the number of coins in the 5 pots is _____.

A telephone book has 502 pages of numbers. Each page has 4 columns and each column has an average of 73 telephone numbers.

In the box below, show how you would **ESTIMATE** (using simple sums and without using a calculator) the total number of phone numbers in the telephone book.

i)

ii) My estimate of the **total** number of telephone numbers is _____.
