

With or without GST

This task is about percentages and discounts of amounts of money.

Jen saw a jacket that she wanted to buy.

The price tag looked like this

a) If the rate of GST is 15%, what was the total cost of the jacket? \$

b) If another jacket cost \$140 + GST (15%), what was its total cost? \$

c) If the price of a matching skirt was \$200 + GST (15%), what was its total cost? \$

d) Another skirt cost \$184 including GST (15%).

What was the price of the skirt before GST was added? \$
