

Temperature changes

This task is about temperatures.

During a week in January the temperatures in Oamaru were recorded. Use the information given to work out the temperature.

- a) The 7.00 a.m. temperature was 6.8°C . By 3.00 p.m. it had risen by 18.4°C .
The 3.00 p.m. temperature was $^{\circ}\text{C}$.
- b) Next morning the 8.00 a.m. temperature was 9.7°C , and at 3.00 p.m. it was 27.4°C .
By how much had the temperature risen? $^{\circ}\text{C}$.
- c) Another morning was warmer with a 7.00 a.m. temperature of 10.5°C , which at midday was 20.2°C .
The temperature had risen by $^{\circ}\text{C}$.
- d) On Saturday the temperature rose 12.8°C between 7.00 a.m. and midday.
If the 7.00 a.m. temperature was 8.7°C , the midday temperature was $^{\circ}\text{C}$
