Bank account

This task is about adding and subtracting amounts of money.

Work out the amount in Hayley's bank account after each transaction.

Hayley had $454.25 in her savings account at the beginning of March.

a) Hayley received $25 on March 10 for her birthday, which she banked.

   The new total in her account was $ [_____]

b) Later in March she banked $12 pocket money and the bank paid 75c in interest.

   The savings account now showed the new total of $ [_____]

c) Hayley then withdrew $10.50 from her account to buy her brother a birthday present.

   The new balance was $ [_____]

d) On March 31 interest of $24.45 from her savings was added to Hayley's account.

   The new balance in the account was then $ [_____]

e) By how much did Hayley's account increase during March? $ [_____]
