

Give-aways

This task is about working out how many people get give-aways.

At a tennis championship, 225 people went through the gate at the entrance.

a) Every 10th person going through the gate was given a free sun visor.

How many sun visors were given away?

b) Every 30th person received a voucher for a free cup of coffee.

How many vouchers were given away?

c) Every 75th person received a sun umbrella.

How many umbrellas were given away?

d) One lucky person got an umbrella, a voucher, and a sun visor.

How many people went through the gate **before** this lucky person?
