

Counting sheep

This task is about calculating the number of sheep in a flock.

A shepherd put his sheep in groups of 4 for easy counting.
They were dipped in 3s and then penned in 6s.

- a) i) If there were 108 groups of 4 sheep how many sheep were there altogether? sheep
- ii) How many groups of 3 sheep were dipped? groups
- iii) How many groups of 6 sheep were penned? groups
