

Ten and Twenty

This task is about finding the missing numbers that make up to ten or twenty.

Read the information and answer the following questions.

a) Teams for non stop cricket need 10 players. Some teams don't have enough people.

i) Rahera's team has 7 players. How many more players are needed?

ii) Kayla's team needs 6 more players. How many players have they got?

iii) James's team has 2 players. How many more players are needed?

b) Room 7 is going on a trip. All students need to pay \$20.

i) Jason has paid \$9. How much more does he have to pay?

ii) Chloe still owes \$12. How much has she already paid?

iii) Nik has paid \$4. How much more does he have to pay?
