

Different fractions on a number line

This task is about ordering fractions.

$\frac{5}{4}$	$\frac{2}{9}$	$\frac{6}{5}$	$\frac{1}{4}$	$\frac{6}{7}$	$\frac{6}{9}$	$\frac{1}{3}$
---------------	---------------	---------------	-------------------------------------	---------------	---------------	---------------

Using the fractions in the box above, write the fractions in their correct positions on the number line below.

$\frac{1}{4}$ has been done for you.
