

Country populations

This task is about writing numbers as whole numbers and in decimal millions.

Whare was doing some research about populations where his classmates came from.

He found the populations for Croatia, Kazakhstan, Fiji, and Samoa.

- a) Whare decided to write the populations as whole numbers not decimal millions. Complete the table below by writing the decimal numbers as whole numbers.

Country	Population (whole numbers)	Population (decimal millions)
i) Croatia		4 million
ii) Kazakhstan		19.9 million
iii) Fiji		0.9 million
iv) Samoa		0.26 million

- b) Whare also found the populations for the Philippines, Indonesia, the Solomon Islands, and the Cook Islands. These were only given as whole numbers. Complete the table below by writing in the populations as decimal millions.

Country	Population (whole numbers)	Population (decimal millions)
i) Turkey	85 800 000	_____ million
ii) Indonesia	277 500 000	_____ million
iii) Solomon Islands	740 000	_____ million
iv) Cook Islands	18 000	_____ million
