

June temperatures

This task is about place value with decimal numbers.

The temperatures in June were recorded to the nearest tenth of a degree.

a) The warmest temperature was 12.7°C and the third warmest temperature was 12.5°C .

What was the second warmest temperature? _____ $^{\circ}\text{C}$

b) The coldest temperature was 2.8°C and the third coldest temperature was 3.0°C .

What was the second coldest temperature? _____ $^{\circ}\text{C}$

c) The average temperatures for June for the last five years were:

8.2$^{\circ}\text{C}$	8.4$^{\circ}\text{C}$	7.9$^{\circ}\text{C}$	8.1$^{\circ}\text{C}$	8.0$^{\circ}\text{C}$
---	---	---	---	---

Put the temperatures in order from coldest to warmest:

coldest

warmest
